

jGRASP Installation Instructions for HOME Computer Users

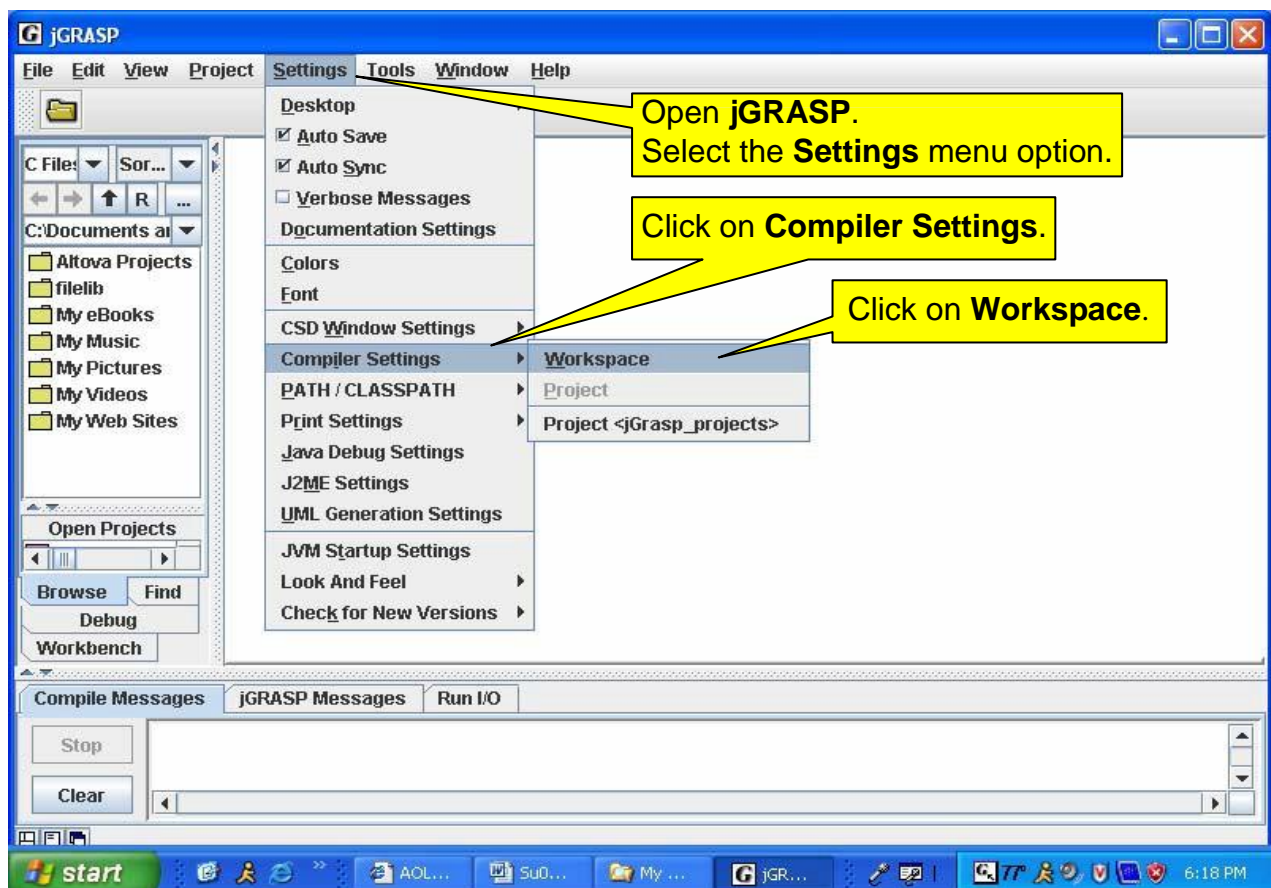

We will use the development environment **jGRASP** and the C compiler **CYGWIN**. You may install **jGRASP** and **CYGWIN** on your home computer. This software is available www.eng.auburn.edu/fci/. Use your AU email login. You may need to install **Java SDK** for JGRASP to run.

Install **CYGWIN** before **jGRASP**.

Click the **CYGWIN Download** in the right column and **RUN**. The **CYGWIN** folder will be added to your **C: drive**.

Click the **jGRASP Download**. You do not need to enter the information in the blue box. Scroll down and select the most current **Windows** or **Mac** version and **RUN**. Choose **NEXTs** to allow the default install.

Double click on the **jGRASP** icon  on your desktop and refer to the following images to set **CYGWIN** as your compiler.

Select the following in the **given order**:

1. "C" Language use the drop box
2. gcc - cygwin (C:\cygwin\bin) - insight debugger
3. Use
4. Apply
5. OK

You jGRASP should be ready to go.
